

Favas T K's Post

Favas T K

Assistant Professor at Cochin University of Science and Technology

1y

It was indeed a nice experience to interact with energetic students of BACE English School on Technology for Space Applications as part of space week observance. The discussions on Cryogenic Technology for Space Applications took me back to the golden days of Cryogenic Engineering post graduation studies at **TKM College of Engineering**. The similarities, differences and challenges between technologies for underwater, surface water and space were also outlined in the presentation. The interesting experience got with Liquid Oxygen from **The Kerala Minerals & Metals Limited** and liquid nitrogen from exhibition of **Institute For Plasma Research** were also explained. Further, the cryogenics research facilities and centres in India were also explored in addition to the space research and higher education opportunities.
